# Natural light now has its dimmer... with the Telis Modulis

Now it's possible to precisely control natural light and maximize the performance of horizontal blinds in the home or office.

Control individual blinds or individual groups of blinds with a multi-channel remote. For example, program each of four blinds on a separate channel for individual control and use the fifth channel (master) to operate the blinds as a group.

Shown in Full Scale  
Telis Modulis RTS Lounge  
Also available in Silver Finish

The scroll wheel is ergonomically designed for intuitive use and is sensitive enough to allow for the most precise adjustment.

## Timer

### Multi Channel Timer with on-screen display

Black Finish  
Also available in:  
Silver Finish

## Infrared (IR) Controls

(for use with IR Motor 1000677)

### One Channel

### Eight Channel

The new Tilt WireFree™ RTS features two speed operation with all Telis hand-held transmitters and DecoFlex switches. Press and hold the open or close buttons to tilt the blind slats at 1/2 speed and release when the desired position is reached. Or press and release to move the blinds slats to their limit or intermediate (favorite) position at full speed.
